

Hydraulics & Hydrology Training

Fish Passage and Stream Restoration Design (FPSRD) Workshop Series

Fish Passage and Stream Restoration Workshop Series Overview

Aimed at promoting knowledge sharing, interdisciplinary discussions, and working relationships among those in FPSRD community

Primary delivery method is Teams Meetings and occasional in-person events

Recordings of the Teams Meetings and bonus materials are posted to the WSDOT FPSRD Forum

Past and upcoming workshops cover topics including:

- ✓ WSDOT'S fish passage camera monitoring program
- ✓ VR and other emergent technologies in FPSRD projects
- ✓ The theory and evolution of large woody material in stream restoration projects
- ✓ Habitat and hydraulic complexity features
- ✓ Sediment transport modeling and more!

The trainings and workshop series are free and no registration is required. To request additional information or sign up for the workshop series, reach out to us at FPSRD@wsdot.wa.gov.

LEARN MORE about this and other Hydraulics and Hydrology course offerings, trainings, and certification programs on our [Trainings webpage](#).
